

# MIRRI IS21

MICROBIAL RESOURCE RESEARCH INFRASTRUCTURE

## Call for applications

### *Job offer*

**Role:** Project manager

**Responsibility:** Development of a business plan for the MIRRI European Biological Resources Centers consortium

The [Center of Biological Resources of the Institut Pasteur](#) (CRBIP) is looking for a project manager to contribute to the development of a business plan for the sustainability of operations of the European Microbial Resource Research Infrastructure – MIRRI.

#### **Context and objectives**

MIRRI (<https://www.mirri.org/>) is a European research infrastructure with the mission to provide the scientific community (in the academia and the industry) with: a) access to a wide variety of high-quality biological resources and associated data, b) long-term sustainability of microbial biodiversity and c) knowledge and professional development. The IS\_MIRRI21 Horizon 2020 project (<https://ismirri21.mirri.org/>) was funded to assure MIRRI's sustainable long-term operation. This initiative has integrated activities to ensure the long-term financial viability of MIRRI, including the establishment of a business model in its work plan.

The proposed job offer aims to contribute to the development of a business plan and to generate a 5-year financial plan for the conception and development of the ideal business model for MIRRI's sustainable operation as a non-profit-entity.

#### **Missions**

- In close collaboration with the executive director, the financial officer, the access officer and other partners of MIRRI, contribute to the development of a five-year financial plan.
- Follow-up the activities developed by other work packages and support the actions where the Institut Pasteur plays an active role.
- Support the development of activities of the IS\_MIRRI21 network and enhance its visibility and impact.
- Generate reports for the Work Package of financial sustainability.
- Take an active role in CRBIP development activities.

#### **Profile**

- A young professional with a Master's degree or equivalent experience. Doctorate degree would be a plus;
- Minimum one year of experience in related projects;
- Excellent knowledge of written and spoken English (minimum C1 level). Knowledge of Spanish and French would be a plus;
- Knowledge and/or experience of European scientific programmes, microbiology and/or Research Infrastructures will be a plus;
- Excellent presentation skills and production of written and oral reports;
